## INDUSTRIAL PROJECTS

---

<b>Project</b>	<b>NYL LTC Agent Commission</b>	
	Associate Engineer- QA	April 2017 – Jan 2018
	Engineer- QA	Feb 2018 – Dec 2018

**Description** NYL LTC is in the process of migrating its current Long-term care agent commissions operations from LTCG to BASIS platform. LTCG is transferring the data that is needed for agent commission calculation to a new application called BASIS through feed files. Virtusa QA team is performing the testing on the new commissions platform to ensure that new commission platform cater the LTC business needs.

**Responsibilities**

- Planning, monitoring and control of the testing activities and tasks.
- Having an ownership of test data management (test data creation & test data loading).
- Maintain required domain knowledge within the team.
- Requirement Analysis and Test designing.
- Conducting peer reviews on the deliverables (Test Designs, Test Cases etc.).
- Participate in SQA reviews, requirement clarification and walk-through sessions.
- Test Execution (functional, and Regression testing).
- Back-end Test execution – Database configurations and testing through Oracle SQL.
- Communicate with onsite team about release progress and production issues.
- Test case, test result and defect tracking in ALM.
- Collaborative working with development teams to get the defects fixed based on severity and priority.
